Robert F. Kennedy Jr Drops Vaccine Truth Bomb Live On TV

December 4, 2018

Robert F. Kennedy Jr. dropped a truth bomb live on TV, defying Big Pharma and corrupt mainstream media by sharing real facts about vaccine safety.

Explaining to Tucker Carlson that this was only the second time he had ever been allowed to talk about vaccine safety on TV, Robert F. Kennedy Jr. launched into a powerful attack on the vaccine industry, comparing it to a lawless mafia state.

“The pharmaceutical industry is so powerful,” he explained. “They give \$5.4 billion a year to the media. They’ve gotten rid of the lawyers, so there is no legal interest in those cases. They have really been able to control the debate and silence people like me.”

Asked how things could get this bad, Robert F. Kennedy Jr. explained that Congress granted Big Pharma “*blanket legal immunity*” when it comes to vaccines.

Big Pharma became a law unto themselves. They can put toxic ingredients in your vaccines, they can seriously injure your child – but you cannot sue them.

“What you have to understand is that the vaccine regimen changed dramatically around 1989. The reason it changed, Tucker, is that Congress, drowning in pharmaceutical industry money, did something they have never done for any other industry – they gave blanket legal immunity to all the vaccine companies.

“So that no matter how sloppy the line protocols, no matter how absent the quality control, no matter how toxic the ingredients, or egregious the injury to your child, you cannot sue them.

“So there’s no depositions, there’s no discovery, there’s no class action suits. All of a sudden vaccines became enormously profitable.”

The enormous profits in the unregulated industry meant Big Pharma companies raced each other to produce new and unnecessary vaccines to pump into newborn children – often dozens at a time.

“It became a gold rush for the pharmaceutical industry to add new vaccines to the spectrum.”

But at what cost? The vaccine industry, operating under their own rules – or rather, complete absence of rules – is making it impossible for us to find out the facts. President Trump has long called for an independent inquiry into vaccine safety. Robert F. Kennedy Jr. is calling for the same.

“I got three vaccines and I was fully compliant. I’m 63 years old. My children got 69 doses of 16 vaccines to be compliant. And a lot of these vaccines aren’t even for communicable diseases. Like Hepatitis B, which comes from unprotected sex, or using or sharing needles – why do we give that to a child on the first day of their life? And it was loaded with mercury.”

Tucker asked, “We do give that to children?”

“We continue to give it to them. The mercury has been taken out of three vaccines, but it remains in the [flu vaccine](#), and it is still in vaccines all over the world. And it is the most potent neurotoxin known to man that is not radioactive.”

“How can we inject that into a child?”

Robert F. Kennedy Jr. tried to put the outrageous situation into context.

“If you take that vaccine vial and break it, you have to dispose of that as hazardous waste. You have to evacuate the building. Why would you take that and inject it into a child?”

But he wasn't finished there. RJK Jr. also took aim at Bill Gates, who recently admitted that he told President Trump "*there is no need*" for an independent inquiry into the safety of vaccines because he has "*looked at it*" and they are "*completely safe*."

Citing a new independent study, funded by the Danish government, which examined the safety of the Tdap vaccine when given to African children, Robert F. Kennedy Jr. left jaws on the floor when he revealed that the vaccine, pushed on African children by Gates, kills more people than the diseases it is supposed to protect against.

"Virtually every kid in Africa gets it. What they found...they did a vaccinated versus non-vaccinated study, which has never been done...what they concluded was...they said that vaccine is killing more people than Diphtheria, Pertussis, and Tetanus combined (for which the Tdap vaccinated)."

The kids who got the vaccine were "*ten times more likely to die from the vaccine*" in the two months following the vaccination, than those children who did not receive the vaccine.

"So we need to do these cost/benefit analyses on every vaccine."

Tucker then asked the question that gave RFK Jr. the opportunity to explain how Big Pharma has marginalized anybody who dares raise questions about anything that could impact their massive profits:

"So why has the point that you are making, that doesn't seem crazy, been so discredited?"

Robert F. Kennedy Jr. replied: "*I'm called anti-vax all the time because the pharmaceutical industry is so powerful. They give \$5.4 billion a year to the media. They've gotten rid of the lawyers, so there is no legal interest in those cases. They have really been able to control the debate and silence people like me. So I'm really grateful to you, for having the courage to allow me on the show to talk about this. This is the second show in 10 years that has allowed me to talk about this.*

"We ought to be having a responsible debate. A debate that is real, that is based on science."

Robert Kennedy Jr: CDC is a privately owned vaccine company

December 5, 2018
Chief Editor

Robert F. Kennedy Jr. claims the CDC owns patents on at least 57 different vaccines, and profits \$4.1 billion per year in vaccination sales.

According to RFK Jr., the CDC is not an independent government agency but is actually a subsidiary of Big Pharma.

[Greenmedinfo.com](#) reports: Mr. Kennedy told [EcoWatch](#), “The CDC is a subsidiary of the pharmaceutical industry. The agency owns more than 20 vaccine patents and purchases and sells \$4.1 billion in vaccines annually.” Again, no source.

I have been around long enough to know that vaccine claims have to be checked and rechecked. And since this is a very old claim, one that I would like to be able to state (if it is true), I decided to review it.

I am fortunate to have, as one of my partners in advocacy, fellow autism parent Mark Blaxill, an Intellectual Property expert who has been employed by billion dollar corporations to manage their patents. Blaxill was the man who found out that HHS, through NIH, owns patents on all HPV vaccines, and receives a percentage of the profits for each dose of Gardasil and Cervarix administered anywhere in the world. He published the stunning revelation in a detailed three part expose entitled, “[A License to Kill? Part 1: How A Public-Private Partnership Made the Government Merck’s Gardasil Partner.](#)”

When I contacted Blaxill to ask how to run a patent search, he was kind enough to do it for me. He found 57 granted US patents with the CDC listed as an assignee. You can see the [search results here](#).

Upon cursory review of the patents, I found that one did not seem applicable to vaccination, but merely referenced an article on vaccination. That leaves us with 56 CDC patents to scrutinize.

Here is what I found.

There are CDC patents applicable to vaccines for [Flu](#), [Rotavirus](#), [Hepatitis A](#), [HIV](#), [Anthrax](#), [Rabies](#), [Dengue fever](#), [West Nile virus](#), [Group A Strep](#), [Pneumococcal disease](#), [Meningococcal disease](#), [RSV](#), [Gastroenteritis](#), [Japanese encephalitis](#), [SARS](#), [Rift Valley Fever](#), and [chlamydomphila pneumoniae](#).

There is a CDC patent for “[Nucleic acid vaccines for prevention of flavivirus infection](#),” which has applications in vaccines for Zika, West Nile virus, Dengue fever, tick-borne encephalitis virus, yellow fever, Palm Creek virus, and Parramatta River virus.

CDC also has several patents for administering various “shots” via [aerosol delivery systems for vaccines](#).

There’s a CDC patent on a process for vaccine quality control by “[quantifying proteins in a complex preparation of uni- or multivalent commercial or research vaccine preparations](#).”

There’s a CDC patent on a method “[for producing a model for evaluating the antiretroviral effects of drugs and vaccines](#).”

CDC has a patent for companies who want to [test their respiratory system](#) applicable vaccine on an artificial lung system.

If a vaccine maker is concerned that their vaccine might contain a [human rhinovirus](#), CDC has a patent on a process for determining if such contamination exists.

CDC has a patent on an assay to assist vaccine makers in finding [antigen-specific antibodies](#) in a biological sample.

CDC holds a patent that provides vaccine makers with a method of “[reducing the replicative fitness of a pathogen by deoptimizing codons](#).” Asserting that, “pathogens with deoptimized codons can be used to increase the phenotypic stability of attenuated vaccines.”

The agency also holds a patent on [adjuvants](#) for a vaccine used on premature infants and young babies.

There is a CDC patent to cover a vaccine for an infection induced by a [tape worm found in pork](#).

They even have patents that cover vaccines for animal illnesses including [Canarypox virus](#), [Fowlpox virus](#), [Sealpox virus](#), [dog flu](#) and [monkey cancer](#).

Does this seem like a public health agency making “independent” vaccine recommendations, or a private company with an impressive portfolio to which one might look for investment opportunities?

The CDC is reputed to be an independent government agency making vaccine recommendations to the public, only for the public good. They are the agency charged with vaccine safety oversight, via their [Immunization Safety Office](#).

Here is how the office describes its charge:

“CDC’s Immunization Safety Office plays a vital role in ensuring our nation’s vaccine safety.

Sound immunization policies affecting children and adults in the U.S. depend on continuous monitoring of the safety and effectiveness of vaccines. CDC uses many strategies to assess vaccine safety, to identify health problems possibly related to vaccines, and to conduct studies that help determine whether a health problem is caused by a specific vaccine. CDC also works with other federal government agencies and other stakeholders to determine the appropriate public health response to vaccine safety concerns and to communicate the benefits and risks of vaccines.

The Immunization Safety Office regularly reports on vaccine safety monitoring findings and any concerns to CDC’s Advisory Committee on Immunization Practices (ACIP). This advisory group develops the recommended vaccine schedule for children and adults in the U.S. ACIP considers the safety and effectiveness of vaccines before making recommendations to the vaccine schedule or changing recommendations for vaccine use.”

Note that they proudly state that they report to the ACIP – the same committee on which Paul Offit infamously served, as if this reporting somehow adds legitimacy to their vaccine safety work. The same committee that [Congress has excoriated for their long history of conflicts of interests](#).

Nowhere on the CDC’s web site can I find the disclosure that the agency is a profit partner with the vaccine makers for whom it is supposed to be providing safety oversight.

Mr. Kennedy is in very safe territory by reporting that the CDC has over 20 patents that create vast, undisclosed conflicts of interests in vaccine safety. He is understating the problem by more than half.

This brief look at current patents held by the CDC deserves an in-depth review to determine exactly what current financial relationships with vaccine makers now exist and what the current impact those revenue streams are likely having on vaccine safety positions. Furthermore, one must closely look at the financial relationships between the CDC and vaccine makers it is currently courting, to include the potential exploitation of new patents for financial gain. These are merely a few lines of inquiry, among hundreds, needing to be examined and why the potential RFK commission on vaccine safety must be impeded.

No wonder the vaccine industry (and let's not kid ourselves, CDC IS the vaccine industry) and their media outlets are fighting with such a fury to prevent the #RFKcommission from being formed.

Fortunately, Mr. Kennedy has already said he will fight this corruption against our children until his last breath, and we seem to have a new president who doesn't care what Pharma and the mainstream media throw at him. There is more than 20 years' worth of documented abuse and corruption in the vaccine program that, if properly examined, would at the very least force reforms that would drastically reduce the profits of the industry.

The vaccine business is currently a \$30 billion per year industry in which organizations like the [World Health Organization](#) have urged increased investment, projecting that it will become a \$100 billion per year industry by 2025. Thus, it is evident that the CDC and their business partners need the public to not only be okay with the 69 doses of recommended childhood vaccines, but to begin to adhere to the additional 100 plus doses of vaccines recommended by the new adult schedule, and to be ready to inject their families with the additional [271 vaccines in the development pipeline](#).

That profit boom can't happen if the corruption in the industry, and the vast, unassessed damage that it has done to the health of children (and now adults) is laid open for all to finally see. The \$30 billion per year industry will become a sub \$10 billion per year industry, with a cap on how much it can make. Because there is a cap on how much the human body can process.

We must continue to press the Trump administration for comprehensive vaccine safety review and reform, including the universal right to forgo any and all vaccines without coercion.

Without a White House to ignore CDC's abuses and run interference with the American public, the corrupt vaccine industry may be turning into a paper tiger, and its media simply a powerless crowd of bullies with a megaphone, broadcasting "sound and fury signifying nothing."
