

The Summer of Musicians who “DIED SUDDENLY”

Valerie Protopapas

From the website COVID News of Dr. Paul Elias Alexander, we have received the information contained below. Now it is possible that at least some of those listed did die from consequences unrelated to the “COVID vaccines” &etc., but as many involved were known to have participated in these mandated “inoculations,” it would be more than criminal to simply ignore the relationship between “the shot” and what happened afterward – especially given the varying ages and overall physical health of those involved. So, for your information, below is the review of those musicians who “died suddenly” during the Summer of 2023, in the months of June through October.

The forty “sudden deaths” listed below have robbed the world of incredible talent and artistic beauty and the question asked in Dr. Alexander’s site is this: were these deaths due to COVID *mRNA technology* (Weissman, Bourla, Kariko et al.) or the vaccines themselves (Pfizer, Moderna, BioNTech et al.)? Even more important, where are the needed autopsies including the staining for spike proteins in each case that would definitively answer these questions? When a perfectly healthy person dies suddenly, the normal routine is to have an autopsy to determine the cause of death and, from that, discover how that cause came to be! Remember, there is always the possibility of foul play and unless the individual involved is sufficiently medically compromised to make a sudden death medically reasonable, certainly most legitimate governments demand answers before that person is “disposed of” however publicly.

Below are the statistics and the people themselves whose deaths leave great questions regarding the intention of our elite “rulers” to lower the world’s population:

- 7 died from aggressive cancer (*turbo cancers” most likely);
- 7 died from heart attacks or cardiac arrest;
- 3 collapsed and died;
- 2 died in their sleep;
- 1 was found dead in his car;
- 1 was found dead in a creek;
- 1 died from a brain aneurysm;
- 1 died from acute liver failure (that includes a history of alcoholism).

[*Turbo cancer: many consider these virulent cancers to be directly related to the COVID “vaccinations” though, of course, this is pooh-poohed by the establishment. Nonetheless, these aggressive and unusual cancers are appearing at every age level in greater and greater numbers. But whether or not there is a connection seems of no interest to our current “healthcare system” though in the past even the possibility of such a thing would have caused an end to whatever treatment *might* have resulted in the problem until the matter could be properly determined.]

Names and Dates (in reverse calendar order):

Oct.23, 2023 - Bristol, UK - British Band “Massive Attack” confirmed the death of 62 year old guitarist Angelo Bruschini from aggressive Lung cancer diagnosed during the summer.

Oct.15, 2023 - New York - Musician and music teacher Steve Campagna died suddenly in the evening of Oct.15, 2023. No cause of death reported. He was COVID-19 mRNA: Vaccinated.

Friends, I ask you to consider that if these “celebrities” – well known and popular – can be “taken out” without consequence by our globalist “leaders,” what possible chance do we average folk have to protect our own lives. This incredible list of just these journalists and “pop” musicians, not counting other celebrities, shows that few people are paying any attention to what is going on except for those who have been labeled “conspiracy theorists” and “nutjobs.” Even a few years ago, this catalogue of horrors would have made and stayed in the headlines until its cause was determined and, if wrongdoing were involved, those responsible would have been brought before the Bar of Justice and properly punished for their crimes. But today?? Apparently, it has become a matter of, “ah, who cares. . .” or so it seems. Do *YOU* care? You had better while there is still time. . . or, more to the point, *if* there is still time.
